PROFESSIONAL SUMMARY

User Experience Designer and Computer Science Engineer specializing in accessible, human-centered digital products, design systems, and data-driven interfaces. Proven track record conducting mixed-methods user research, architecting workflows, and accelerating design-to-engineering handoff across enterprise and mobile platforms. Guided by firsthand perspective navigating life with Cerebral Palsy, championing cognitive clarity, and inclusive experiences that elevate human potential.

TECHNICAL SKILLS

Design & Prototyping: Figma, FigJam, Adobe Photoshop, Adobe Illustrator, Adobe XD, Autodesk Inventor, Atomic Design Systems, Wireframing, Rapid Prototyping, Design Tokens, Micro-interactions.

UX & Research Methods: Usability Testing, User Interviews, Persona Development, User Journey Mapping, Information Architecture (IA), A/B Testing, Heuristic Evaluation.

Frontend & Development: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Vite, Tailwind CSS, Three.js/WebGL, Python, Git, GitHub.

PROFESSIONAL EXPERIENCE

UI Design Intern – Impact Events

June 2026 – August 2026

Remote / United States

- Spearheaded the responsive mobile redesign of the core event-management platform, converting multi-step desktop workflows into intuitive mobile screens and cutting user task completion drop-off by 18%.
- Architected and standardized an Atomic Design System in Figma with 45+ reusable UI components, responsive layout tokens, and developer-ready specs.
- Moderated usability evaluations across legacy mobile flows, resolving critical tap-target and contrast bottlenecks to boost mobile task efficiency by 22%.

Associate UX Designer – In-House Anonymous

December 2024 – May 2025

Remote / Brooklyn, NY

- Engineered end-to-end interface architectures and interactive prototypes for an enterprise security platform, driving a 15% increase in active user engagement.
- Facilitated structured usability testing sessions with 25+ diverse participants, translating qualitative insights into data-driven interface iterations.
- Refined core navigation hierarchy and information taxonomy across web dashboards, eliminating user friction points and decreasing user error rates by 12%.

Freelance Product Designer – i2u.ai

September 2024 – January 2025

Remote / Bengaluru, India

- Directed end-to-end UX architecture and visual brand identity for an emerging AI data intelligence platform, driving early user adoption.
- Executed mixed-methods user research and iterative A/B testing across distinct interface variations, significantly streamlining customer onboarding journeys.
- Constructed wireframes, high-fidelity clickable mockups, and responsive component libraries in Figma, fostering cross-functional alignment.

Hybrid / Hubli, India

- Crafted intuitive user journeys for a security agency customer portal and operations command dashboard, producing a lift in customer engagement.
- Conducted formal usability evaluations with enterprise stakeholders and field dispatchers, implementing design refinements.
- Authored design system specifications, user operational flowcharts, and low-fidelity prototypes, standardizing reusable UI assets.

FEATURED PROJECTS

Nexus AI (Machine Learning Data Platform) – Lead Product Designer

Tools: Figma, React, TypeScript, Python, Atomic Design System

- Architected the complete UX/UI and node-based visual dataflow editor in Figma, empowering non-technical stakeholders to intuitively configure machine learning pipelines.
- Implemented a minimalist design system with clear typographical hierarchies and real-time status indicators, reducing cognitive load.

USPS Digital Experience Redesign – UX Designer

Tools: Figma, User Journey Mapping, Wireframing, Prototyping

- Mapped existing user journeys for package tracking and delivery scheduling workflows to identify cognitive bottlenecks and streamline service navigation.
- Designed grounded, high-fidelity digital prototypes in Figma focused on mobile usability, clear typography, and simplified task completion.

Security Agency UX Platform – Lead UX Researcher & Designer

Tools: Figma, Information Architecture, Usability Testing, Persona Modeling

- Engineered an enterprise Security Operations Center (SOC) dashboard and client acquisition intake portal to decrease navigation complexity.
- Synthesized target field research across 3 user personas (operations managers, facility heads, retail owners) to guide the interface taxonomy.

Mumbai Olympics 2028 Brand & Motion Design – Brand & Interactive Designer

Tools: React, TypeScript, Tailwind CSS, SVG Rendering, Broadcast Motion

- Created a comprehensive visual identity blending typography with major regional landmark contours to establish a cohesive brand system.
- Built an interactive web-based logo generation studio with dynamic color, procedural motion modes, and vector export pipelines.

Smart Assistive Pill Dispenser 3D Model – Product Designer

Tools: Autodesk Inventor, 3D Modeling, Ergonomic Design

- Modeled a conceptual 3D assistive medicine-dispensing unit in Autodesk Inventor, prioritizing ergonomic accessibility and intuitive visual interaction.
- Designed the internal layout for electromechanical subsystems virtually to map out spatial requirements for automated dispensing mechanisms.

EDUCATION

University of Colorado Boulder – Boulder, CO

August 2025 – May 2027

Master of Science (M.S.) in Creative Technology and Design

GPA: 3.9/4.0

- **Relevant Coursework:** Design Methods, Business in Creativity, User Experience Design & Research, Vibe Coding.

KLE Technological University – Hubli, Karnataka, India

August 2020 – June 2024

Bachelor of Engineering (B.E.) in Computer Science and Engineering

- **Relevant Coursework:** Software Engineering, Agile Methodologies, Machine Learning, Web Technologies.

CERTIFICATIONS, PUBLICATIONS & ADVOCACY

Certifications: Google Career Certificates ([Foundations of UX Design](#); [Empathize, Define & Ideate](#); [Wireframes & Prototypes](#)). Accenture Digital Skills: [User Experience](#). IIT Madras: [Cyber Security & Privacy](#).

Publications: [Intra-Oral Periapical Dental Classification using Convolutional Neural Network](#) (IEEE Xplore). [3D Avatar Reconstruction Using Multi-Level Pixel Aligned Implicit Function](#) (Springer).

Inclusive Design Advocacy: Thriving professional in design and technology living with Cerebral Palsy. Applying firsthand lived experience to champion radical accessibility, eliminate cognitive and physical friction, and engineer digital experiences that empower people of all abilities.
